REACH- Declaration

Dear Customer,

Declaration referring to directive EG 1907 / 2006 for the registration, evaluation, approval and limitation of chemical substances (REACH).

The REACH-directive intends that chemical substances which are produced in higher quantities than one ton per year may only be sold within the countries of the European Union by prior registration.

We do not produce nor import any such substances or composites which the REACH regulation pertains. REACH directive means for MBS that it is a "downstream user". So GMW is not committed to registration and is not obliged to issue safety data sheets.

The goods which we deliver are manufactured and can't be defined as substances or composites. Our products do not contain any substances on the current candidate list. With regard to our concern for GMW and our customers we remain in steady contact with our suppliers in order to assure that all delivered products correspond to REACH-directive.

Our suppliers are also obliged to inform us without request and without delay, if their delivered products contain a SVHC-substance (substances of very high concern) exceeding the limit of 0.1 mass percent.

In case we receive such an information and hereby gain knowledge that in our products the limit of 0.1 mass percent of SVHC-substance is exceeded we will inform you immediately.

The list of SVHC substances, updated on 04 February 2026, currently comprises 253 different substances and is published on the website of the European Chemicals Agency (ECHA) at <http://echa.europa.eu/candidate-list-table>.

Place, date:

Cadolzburg, 20.03.2026

Signed on behalf and in the name of GMW:

Susanne Köppel
Operations Management

All information supplied by us in connection with REACH and SVHCs is based on the manufacturers' data and is provided to the best of our knowledge. However, we cannot provide a guarantee that the information is complete and accurate.
