## TG omni App:

It is a free application. Further development will no longer be driven forward and no new updates will be released.

The following devices are supported:

TG omni 1

TG omni 2

(except MED application, TestMaster app required)

TestMaster App:

It is a fee-based application. The TestMaster app is constantly updated and expanded with new functions. It is activated for a period of use of 12 months after purchase of the device without any costs. In order to benefit from continuous development, new functions and comprehensive support after the first 12 months, an annual maintenance fee must be paid.

GMW recommends an annual maintenance and calibration!

For this reason, we offer the maintenance fee of the TestMaster app is credited in full for a regular, annual device calibration at GMW.

The following devices are supported:

TG omni 1

TG omni 2

TG basic 2

TG basic 2+

TE uni 2

Test-Master App Comfort (graphical user interface)

- The Comfort version enables a fast and easy inventory without writing effort and possible errors

- Predefined equipment catalog, can be customized according to customer requirements

- Tiles/graphical pictograms of the equipment catalog for quick and easy selection of test item data
