

Shunts

CATALOGUE

GMW - We make your values visible

We provide our customers with our products the entire spectrum to solve everything EMAS tasks and thus tools for sustainable use of electrical energy. As a complete provider we also realize the whole project from A to Z, from project consulting to commissioning training and maintenance.

SWITCHBOARD COMPONENTS

VOLTAGE DIVIDER

LOW VOLTAGE SWITCHGEAR

Shunts

The long-lasting shunts of GMW are used to expand the current measuring range of moving-coil measuring devices for the reliable display and further processing of direct currents, especially for high currents up to 30000A.

The direct current flowing through the shunt generates a proportional voltage drop, which can be displayed with a moving-coil meter, connected in parallel or can be electronically processed as an example.

The shunts are manufactured according to DIN 43703 and DIN EN 60051.

The accuracy is 0.5% relative to the nominal value. On request the shunts can also be realized with a higher accuracy of 0.2%.

The rated currents are in the range of 1A to 30000A, which are produced in three different construction types, depending on the rated current.

Up to 25A the shunts are always mounted on a isolating base, which can either be mounted on a 35 mm DIN-rail or by means of screws.

As a voltage drop 50mV to 300mV are available. On customer request we are also able to realize other values.

Operating conditions:

- ▶ Working temperature range: $-10 \leq \vartheta \leq +55 \text{ }^{\circ}\text{C}$
- ▶ Storage temperature range: $-25 \leq \vartheta \leq +65 \text{ }^{\circ}\text{C}$
- ▶ Relative air humidity: $\leq 75 \text{ } \%$ (no dewing)
- ▶ Climatic adaptability: Climatic class 3 acc. VDE/VDI 3540

Accuracy:

- ▶ Accuracy class: Class 0.5
(Class 0.2 upon request)

Material:

- ▶ Resistance bars: Manganin
- ▶ Connection units type A: Brass
- ▶ Connection units type B: Brass/Copper
- ▶ Connection units type C: Copper

Connections:

- ▶ Current phase: Refer to drawings
- ▶ Voltage phase: M5 x 8

Safety:

- ▶ Protection class: IP00

Material profile of the connection units:

- ▶ Construction type A: Plane profile with isolating base (1 ... 25A)
Plane profile without isolating base (30 ... 150A)
- ▶ Construction type B: L-profile
- ▶ Construction type C: T-profile

Production regulations:

- ▶ DIN 43703 Shunts
- ▶ DIN EN 60051 Direct active, signalling measuring units and accessories

Standard configurations:

- ▶ Nominal voltage drop: 60mV; 100mV; 150mV; 300mV
- ▶ Overload capability: 1.2-times, continuously
5-times, max. 5 sec. ($\leq 2000\text{A}$)
2-times, max. 5 sec. ($> 2000\text{A}$... 10000A)
- ▶ Nominal current: 1 ... 15000A
- ▶ Accuracy: Class 0.5
- ▶ Isolation base: 1... 25A as standard
30...200A as accessories
- ▶ Cover cap as accessory available: 1...200A (60mV); Art.-no.: 59050

Special configurations:

Due to the flexible structure of the production the realization of individual customer requests is possible.

- ▶ Different voltage drop
- ▶ Different nominal current
- ▶ Accuracy class 0.2
- ▶ Construction types acc. drawing for your specific situation

Order example:

- ▶ Nominal voltage drop: 60mV
- ▶ Nominal current: 1000A
- ▶ Accuracy class: 0.5
