

Three-phase current transformer set

ASK(D) 31.5

ASK(D) 31.5 2U

with Plexiglas caps

Configuration:

The measuring transformer set consists of 3 individual current transformers which are mounted on an aluminium base plate together with the primary conductors L_1 , L_2 , L_3 . Transparent sealable covers protect the secondary terminals of the current transformers against external tampering.

Stipulation of the VBG4 (German protection clause) demands that all voltage carrying parts are made shock-proof with transparent isolating covers which are included in the deliveries.

As an option the current transformer set can be supplied with or without fuses. The voltage can be tapped either from the 10 A-fuse element or directly from the individual primary conductor.

The configuration of this current transformer set conforms to the technical requirements and guidance:

IEC 61869/1+2

DIN 42600

ASK(D) 31.5 with base plate
