Sonel CMM-series

Handheld multimeter with a wide range of functions

- Versatile measurement functions
- Robust and safe
- High ease of use

Sonel MRU-series

Earth resistance measuring devices

- Versatile measurement functions
- High test current, precise measurement results
- Robust design and compliance with standards

NEW

Sonel EVSE-100

Multifunctional testing device
for testing vehicle charging stations

- Tests AC charging stations (Type 2, 1-/3-phase) and mobile chargers in accordance with IEC 61851
- Simulates vehicle states (A-D) and tests PP/CP signals and fault scenarios
- Measures safety and function: loop impedance, RCD, earthing, insulation, continuity

Sonel bundle

PV technology

Set for measuring PV systems, consisting of:

MPI-540 + IRM-1 MPI + CMP-1015-PV

- **Comprehensive plant inspection:**
Enables complete control of PV strings, modules and inverters – including voltage, current, insulation and earth resistance.
- **Rapid fault diagnosis:**
Detects performance losses, interruptions or insulation faults at an early stage – reduces downtime and maintenance costs.
- **Safety in line with standards:**
Supports testing in accordance with DIN VDE 0100-712 and IEC 62446, ensures documentation and system certification.
- **Efficient working methods:**
Combined measurement functions, robust construction and wireless data transmission facilitate mobile and safe testing.

Sonel bundle

Electrical installation

Test kit for electrical installations, consisting of:

MZC-306 + MIC-10 + CMP-2000

- **Universally applicable:**

For all electrical work, especially on circuits with 400/690 V.

- **Versatile locations:**

Flats, houses, public buildings, workshops,
factories and wind farms.

- **High short-circuit resistance:**

For systems with short-circuit currents up to 5.3 kA
(measurements according to EN 61557).
